

COVID-19: We're here to help

Get your medications without leaving home

Making sure you have access to your medications is our priority. We're also committed to helping you and your family to stay safe as the coronavirus pandemic (COVID-19) continues to evolve. Because the Centers for Disease Control (CDC) recommends staying at home to help prevent exposure, we'd like to remind you that, as part of your prescription benefit plan, you can have your medications delivered to your door.

Home delivery from CVS Caremark® Mail Service Pharmacy

There are no delivery fees.

90-day supplies of your medications are delivered to your home, or any other address you choose, by mail with no delivery fees. You may even save money on your medications.

Your shipments are safe.

All of our facilities, including our mail service pharmacy, are taking CDC-recommended precautions, including hand washing, use of gloves, and frequent cleaning and disinfecting of all commonly touched surfaces. As always, your medications are delivered by mail in secure, tamper-resistant packaging.

Two easy ways to get started:

1. Call your doctor and ask them to send a new 90-day prescription to CVS Caremark Mail Service Pharmacy.
2. Or, request a new 90-day prescription at **Caremark.com**.
 - Select **Prescriptions** from the navigation bar then select **Request a New Prescription**.
 - Search for your drug name and strength, add to your cart by selecting **Request a New Prescription**, and complete your order.

For more information about access to your medications, safety measures to help protect you and your loved ones, updates from the CDC, and answers to frequently asked questions about COVID-19, visit Info.Caremark.com/COVID19.
